### **DETAILED ACTION**

This office action is responsive to communication filed on 07/19/2002.

#### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, Claims 1 – 3, 7 – 12, and 14 - 18, drawn to a method to establishing e-mail communication between two users/devices who/which both have access to the Public Switched Telephone Network, without being connected to the Internet, classified in class 709, subclass 206.

Group II, Claims 4 - 6, drawn to a method of deriving an alias IP address from the telephone number, whereby the alias IP address is derived from a telephone number (including area and country code), classified in class 709, subclass 201.

Group III, claim(s) 13, drawn to a method of using an arbitrary 32-bit identifier as alias IP address for the purpose of TCP/IP communication, classified in class 709, subclass 219.

Group IV, claim(s) 19, drawn to a method of combining a unique system control unit identifier, and an assignable appliance control units connected to it, classified in class 709, subclass 220.

Art Unit: 2157

The inventions listed as Groups I, II, III, and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I recites a method of establishing a data link, and point to point protocol (ppp) connection between a sender and a receiver; Group II recites deriving an alias IP address from a telephone number; Group III recites using an arbitrary 32-bit identifier as alias IP address for the purpose of TCP/IP communication; and Group IV recites a method of combining a unique system control unit identifier, and an assignable appliance control units connected to it.

A telephone call was made to Mr. Anthony J. Zelano on 11/22/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
